

SUG Telecon 18 April 2017

Present: Jim B, Jim T, Chuck, Mark, Wes, Tom, Shing, Dick

Tom – has not been posting because of problems with the Data list

Dick – some problems getting external drive at WCCRO working with XP machine

Jim B. – interesting Io-D activity on SDRPlay2. Will try to go lower in frequency

Wes - intermittent RFI problems.

Chuck – some baseline noise but averaging seems to clear it up

Discussion of HEC grant annual progress / activity report which is due. SUG will provide Chuck any info needed as to status of stations.

Shing urged that we stay in contact with new Jove observers to help them and keep them engaged.

Chuck described work his student is doing to analyze galactic background quiet day curve. Shing suggested no averaging be used.

Dick noted that those stations with SDRPlay spectrographs could go as low as 13 MHz based on the high pass filter in the multicouplers.

Shing urged that management group define science goals for observers

Eclipse practice telecon Wednesday (19 April) at 7 PM eastern time.
