

Subject: [radiojove-data] 31 Mar 2014 non-Io-A

From: Dave Typinski <davetyp@typnet.net>

Date: 04/07/2014 23:50

To: RadioJove-Data <radiojove-data@lists.nasa.gov>

Here's some brief non-Io-A from last Monday night.

A few L bursts from 19 to 26 MHz, RCP, no modulation lanes.

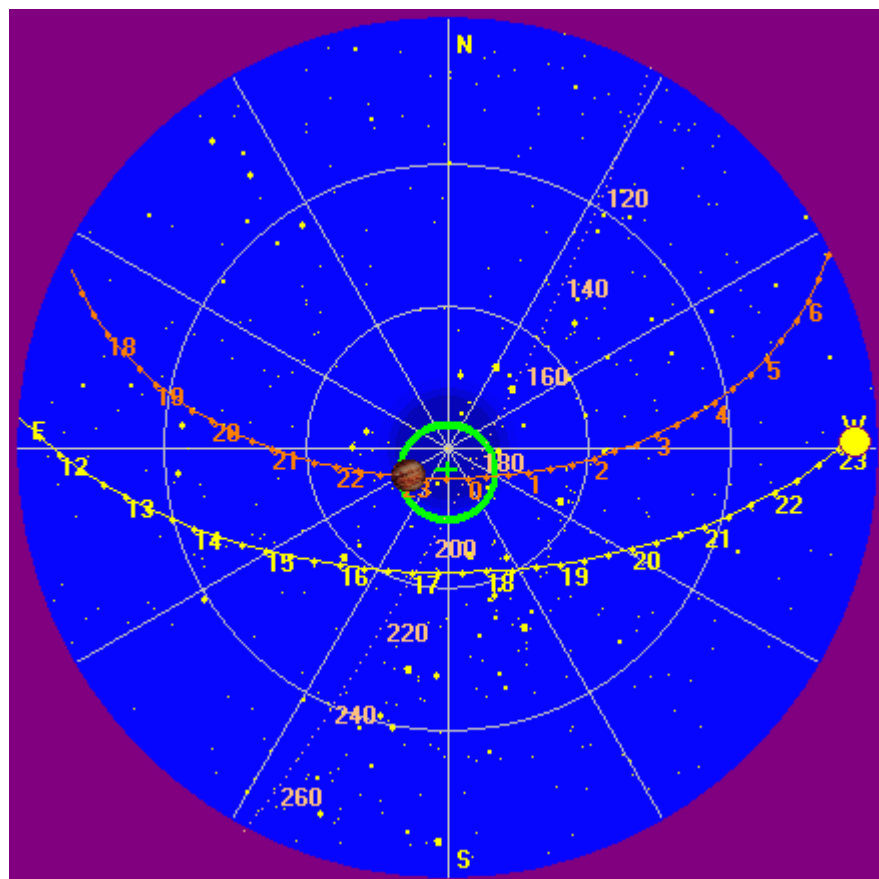

Jupiter was 8° off axis.

Jupiter was trailing the Sun by 90°.
